Payment risk analysis

Late payment risk

Date: 20 November 2019

Late payment risk

Key influencing factors

- Trade payment information exists for this company in the D&B database
- The amount of 30 day or more past due debt indicates a potentially lower risk of severely delinquent payment*
- The amount of 60 day or more past due debt indicates a potentially lower risk of severely delinquent payment*
- The location of this entity indicates a potentially higher risk of severely delinquent payment
- The proportion of overdue debt indicates a potentially lower risk of severely delinquent payment*
- The size of this entity indicates a potentially lower risk of severely delinquent payment

NOTES

* Indications of slowness can be the result of disputes over merchandise, skipped invoices etc.

D&B's late payment score predicts the likelihood that a business will pay late within the next 12 months. The average entity has a 12.1% probability of late payment.

Key to scores

Score range	Risk class	Relative risk level	Probability of severe late payment
587 - 799	A	Minimal	1.04%
546 - 586	B	Very low	1.94%
